instagram: @rachelqiandesign

*I am an industrial designer passionate about designing the future of wearables and healthcare. I believe that user-centered methods combined with unconventional digitized approaches build new paths to solving problems. Being an empathetic designer, I put myself into user's shoes and find the solutions that they truly desire.*

French(Conversational)

### EXPERIENCE

#### Orka August 2020 - Present (5 months) Industrial Design Intern (Team Leader)

*I am currently working for a company specialized in medical electronics, developing the first generation of hearing aids that will be launched in Q1 2021. I am leading the design of the unboxing experience, from concept to manufacturing. Also being part of the cross-functional team in charge of hearing aid product launch, I worked closely with engineers and project managers to support the process.*

#### Fin vs Fin April 2020 - September 2020(6 months) UX/UI Design Intern

*I worked for a fintech and wellness product review platform as a UX/UI and marketing designer. My main task was to develop websites and applications for the mobile experience associated with SEO to attract more audiences and affiliated partners for the business.*

#### The Rooster Factory September 2019 - December 2019 (4 months) Packaging&Graphic Design Intern

*I worked for a brand agency as a packaging and graphic designer. My tasks were to create brand identity, packaging, and develop websites/app for various clients in the spirit industry to carry out each brands' positioning and brand identity.*

#### Under Armour July 2019 Sponsored Industrial Designer

*Spending two weeks at Under Armour, I designed running footwear for the 2024 Paris Olympics with the Director of the Innovation Team.*

#### Xiaomi January 2019-April 2019 (4 months) Industrial Design Intern

*I worked as an industrial designer at Xiaomi, participating in ideation, prototyping and manufacturing process, and assisting senior designers in the development of the MITV5.*
